Re: 8599 66<sup>TH</sup> ST Pinellas Park

Dear Terry:

We wanted to take this opportunity to thank you, Jimmy, your architect, and all of your employees who designed and worked on our building. You all did such a fabulous job. We are very pleased with the building and with the very expedient time frame in which you built this building. You did the entire job within the time frame and the budget that we agreed upon. That was quite a feat! We are sure this was no easy task since we were not available to assist you or Jimmy when questions or issues arose.

In addition, we sincerely appreciate all the assistance that you gave us with the actual move. Your very generous offer of the use of your construction trailer made such a difference. It gave us two additional months to unload and settle into the new building and saved us numerous trips by not having to move each large item separately.

We highly recommend your Company to anyone considering building a new building. We really appreciate the fact that you took care of any punch list items in an expedient manner and with no disruption to our normal business operations. You are a man of your word and that is a rare commodity in Contractors these days. We are thankful that we selected England Brothers Construction Company Inc.

Please add our name to your list of very satisfied customer references.

Sincerely,

Robert & Debra Calcagni
